TEXAS NATURAL RESOURCE CONSERVATION COMMISSION

Protecting Texas by Reducing and Preventing Pollution

May 15, 1996

Mr. Randy Gaddy
1440 Hidden Valley Lane
Brenham, TX 77833

Dear Mr. Gaddy:

Enclosed are the results of the water samples taken from your water supply well as a part of the U.S. Environmental Protection Agency (EPA) and Texas Natural Resource Conservation Commission (TNRCC) inspection conducted in March 1996. Water samples from the well were collected to determine the normal or background concentrations of metals, pesticides, and volatile and semi-volatile organic compounds that may occur in the ground water produced by the well. A review by TNRCC of your water well sample results did not indicate any concentrations in excess of acceptable maximum contaminant levels for the compounds analyzed.

Thank you for your cooperation. Should you have any questions, please do not hesitate to contact Ray Newby of my staff at (512) 239-4132.

Sincerely,

A handwritten signature in cursive script, appearing to read "Wesley G. Newberry".
